

## ARE YOU INTERESTED IN RESEARCH?

The Luxembourg National Research Fund (FNR) is the main funder of research activities in Luxembourg. Our vision is to establish Luxembourg as a leading knowledge-based society through science, research and innovation, thereby contributing to the country's economic diversification and future prosperity. To this end, we support researchers and invest public funds and private donations into research projects in key strategic areas, with an emphasis on quality and impact. We also support and coordinate activities to strengthen the link between science and society and to raise awareness for research. We are very well connected to government and national stakeholders, to the private sector, and to international partners. If you share our excitement about what's coming next in research and innovation, the FNR is the place for you.

We seek to recruit for an immediate opening a:

### SCIENCE COMMUNICATOR/SCIENCE WRITER (F/M)

To strengthen our team within the Research Funding Programmes.

The position is on a permanent full time contract (CDI).

#### YOUR FUNCTION

You will become part of the Science in Society team within the FNR and will be in charge of writing and commissioning/editing articles and fact checks for science.lu about scientific topics which are of interest for public debates. Furthermore you will create posts, infographics and videos for science.lu social media and help prepare fact checks in video formats. You will also be involved in other activities of the Science in Society team of the FNR. **The position demands a high level of writing, communication and language skills and a high reactivity towards the latest trends and news.**

#### YOUR PROFILE

- You hold a Masters degree (Bac +4) or a PhD in natural or social sciences or in journalism.
- You have perfect writing skills in either German or French, and you have very strong writing skills in German, French and English, and you understand Luxembourgish (written and oral).
- You have a demonstrated interest in journalism, science, science communication towards the public and politics.
- Previous work experience or training in journalism, science communication and/or research is considered an advantage.
- You actively follow the public debate and keep yourself updated and are passionate about the latest discoveries and developments in science and technology.
- You are rigorous and well organised and have a sense of initiative and responsibility.

#### OUR OFFER

- The opportunity to connect science and society and to have an impact on evidence-informed public debates;
- The possibility to work at the heart of Luxembourg's young and dynamic research ecosystem and to network with a variety of stakeholders;
- A permanent employment contract;
- A compensation commensurate with your experience;
- A high level of autonomy and flexible working hours;
- Career development opportunities.
